

ASIF IKBAL

Technical Project Manager — AI Operations — Agile Delivery — Creative-Tech Collaboration

asifikbalprotik@gmail.com • +8801878044854 • LinkedIn • GitHub
Dhaka, Bangladesh

Professional Summary

Technical Project Manager with 4+ years of experience leading AI-driven, digital, and operational projects in fast-paced startup and technology environments. Experienced in Agile and Scrum methodologies, sprint planning, Jira tracking, stakeholder communication, AI workflow coordination, and cross-functional project execution. Skilled in managing creative, engineering, QA, operations, and annotation teams while improving workflows, delivery consistency, and operational performance. Strong background in AI operations, process automation, reporting dashboards, SOP development, team training, and creative production support. Possesses foundational web development knowledge to collaborate effectively with technical and product teams.

Core Competencies

Project Management • Agile & Scrum • Sprint Planning • Jira Tracking • AI Operations • Workflow Optimization • Client Communication • Stakeholder Management • Cross-functional Team Coordination • SOP Development • Team Training • Quality Assurance • SLA/KPI Monitoring • Dashboard Reporting • Process Automation • Creative Production Support • Risk & Issue Management • Continuous Improvement

Tools & Platforms

Jira • Notion • Slack • Google Workspace • Microsoft Excel • Google Sheets • Retool • Looker Studio • Canva • Adobe After Effects • GitHub • Postman • Lucidchart • n8n • Basic Web Development

Professional Experience

Appalux Global IT

Apr 2025 – Present

Technical Project Manager

Dhaka, Bangladesh

- Managed end-to-end delivery operations across AI-based projects using Agile methodologies and sprint-based execution.
- Led daily standups, sprint planning, retrospectives, backlog reviews, and Jira sprint tracking to maintain project alignment and delivery momentum.
- Coordinated cross-functional teams including creative, engineering, QA, operations, and annotation teams to ensure timely project execution across multiple concurrent workstreams.
- Communicated directly with international clients and company stakeholders to provide project updates, resolve blockers, and align delivery expectations.
- Led AI data annotation workflows while maintaining quality standards, operational consistency, and SLA compliance across distributed teams of 70+ members.
- Improved operational accuracy from 82% to 97% through workflow optimization and execution tracking improvements.
- Developed SOPs, workflow documentation, and onboarding materials to improve execution consistency and reduce onboarding time for new team members.
- Trained and mentored team members on workflows, quality standards, delivery best practices, and operational processes.
- Built lightweight workflow automations using n8n to reduce repetitive manual tasks and improve process efficiency.
- Created reporting dashboards using Retool and Looker Studio to improve KPI visibility, operational reporting, and project tracking.
- Supported creative production initiatives through Canva-based design work and motion graphics creation using Adobe After Effects.

Quantigo AI

Dec 2023 – Apr 2025

Associate Delivery Lead

Dhaka, Bangladesh

- Managed project coordination and sprint execution across multiple AI-focused delivery teams within a Scrum environment.
- Participated in sprint planning, retrospectives, backlog grooming, daily standups, and Jira-based task tracking.
- Coordinated with engineering, operations, QA, and stakeholder teams to maintain delivery quality and execution consistency.
- Managed workflow coordination, progress tracking, and operational reporting across multiple concurrent projects.
- Identified workflow bottlenecks and implemented process improvements to reduce operational disruptions and improve team efficiency.
- Monitored KPIs, workflow performance, SLA adherence, and operational delivery metrics to support project reporting and execution visibility.
- Maintained sprint documentation, project reports, and operational records to ensure transparency across teams.
- Supported issue escalation and resolution processes to maintain delivery timelines and workflow continuity.
- Assisted in training team members on operational workflows, quality expectations, and execution processes.

Quantanite

Aug 2022 – Dec 2023

Project Associate

Dhaka, Bangladesh

- Supported service delivery operations including workflow coordination, reporting, quality monitoring, and task management.
- Assisted in SLA compliance tracking, operational issue resolution, and delivery coordination across multiple projects.
- Coordinated with internal teams to maintain workflow alignment, execution consistency, and delivery timelines.
- Prepared operational reports and tracked project progress to support management decision-making and reporting visibility.
- Identified workflow inefficiencies and recommended process improvements to improve operational performance.
- Maintained documentation related to workflows, operational procedures, reporting structures, and delivery processes.

Bengali AI

Aug 2021 – Jan 2023

Data Operations Associate

Dhaka, Bangladesh

- Supported AI data operations and annotation workflows while ensuring adherence to project guidelines and quality standards.
- Assisted in workflow execution, data validation, operational coordination, and quality review activities.
- Collaborated with cross-functional teams to maintain data quality, workflow consistency, and delivery accuracy.
- Identified and resolved operational and data-related issues to improve execution quality and project reliability.
- Maintained documentation, reporting, and workflow tracking activities across AI-focused projects.

Education

B.Sc. in Computer Science and Engineering (CSE)

Bangladesh University of Business Technology

2018 – 2022

Certifications

Project Management – Coursera (2024)

Generative AI for Project Management – PMI (2024)

Web Development Course – SoftTech IT (2020)
